Senator William Stachowski Has Sixteen Senate Bills Passed

During Two Week July Session

Include Critical Empire Zone Reform and Amada's law

Senator William T. Stachowski (D 58th) had sixteen New York State Senate Bills passed during the recent two week July session. That included eleven during the two marathon sessions that took place on July 15th & 16th, going well into the early morning hours. Among the sixteen bills authored by Senator Stachowski are several that will have a significant impact on western New York.

Nine of the sixteen bills involve economic development and four will have a positive effect on Empire Zone participants. (Empire Zones were created to stimulate economic growth through tax incentives and designed to bring new business to the state and allow existing businesses to grow and add jobs).

Recent changes to the Empire Zone qualifications in the 2009-2010 state budget threatened the participation of many existing Empire Zone participants in the Buffalo and Niagara Falls area. Senator Stachowski's legislation (# S-5598) would assure that businesses that have met their obligations under the Empire Zone law are treated fairly in the recertification/decertification process.

Senator Stachowski also had bill S5575 passed which would establish an Empire Zone task

force, made up of public and private-sector professionals, which would consider changes to the Empire Zone program before it expires.

This legislation was praised by Unshackle Upstate Executive Director Brian Sampson, "Senator Stachowski and his upstate Senate colleagues should be praised for their foresight in establishing this task force and for clarifying the language established in the budget process. Empire Zones are an extremely vital economic development tool that helps businesses remain viable and provides a valuable lure to new businesses. With tax and energy burdens that exceed national averages, New York businesses need all the help they can get to continue to compete in a global economy."

Another significant bill authored by Senator Stachowski and passed in the Senate was "Amanda's Law". Amanda's Law addresses the need for carbon monoxide detectors in any home or dwelling that has an appliance that emits the deadly gas. Unfortunately, it was the tragic loss of 16 year old Amanda Hansen of West Seneca that brought this issue to the forefront and this legislation would help prevent another such tragedy in the future.

This piece of legislation had a personal importance to Senator Stachowski. "I'm proud to stand with Assemblyman Mark Schroeder, who has passed a similar Bill in the Assembly, in sponsoring this important legislation. I can't say enough about Amanda's parents who battled through the unimaginable loss of a child to seek out this legislation in the hope that another such tragedy does not happen again."

The sixteen bills are as follows:

Bill No.

S2289A

STACHOWSKI -- Creates a regional technology commercialization fund and grant program in the New York state foundation for science, technology and innovation.

S2440

STACHOWSKI -- Exempts from real property taxation real property owned by a person certified to receive a United States department of veterans affairs disability pension.

S2791A
