

CORONAVIRUS

FACTS, RESPONSE, PREVENTION

Coronaviruses are a large family of viruses that cause respiratory illness ranging from the common cold to more severe respiratory diseases like bronchitis or pneumonia. Animal hosts infect humans with the virus. It can then spread from person to person.

CORONAVIRUS DISEASE 2019 (COVID-19)

The 2019 strain is the 7th human coronavirus and the cause of coronavirus disease 2019 (COVID-19). The virus is closely related to those that have caused past outbreaks. All have their origins in bats. They spread through respiratory droplets.

COVID-19 SYMPTOMS
Can Appear After 2 to 14 Days

FEVER & FATIGUE

COUGH +/- CONGESTION

TROUBLE BREATHING

ORIGINS OF COVID-19

COVID-19 originated in December 2019 in Wuhan, China. As of March 2020, the number of confirmed cases globally exceeded 93,000.

COVID-19 IN NEW YORK STATE

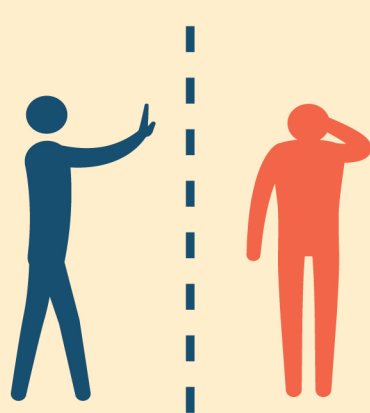

COVID-19 is in New York State. The spread of the virus has been predominantly through travel to high-risk areas. However, the State has moved to combat the ongoing person-to-person, or community spread, of COVID-19.

NEW YORK STATE IS PREPARED

- Active Screening & Tracking
- \$40M to Fund Statewide Response
- No-Cost Testing for COVID-19

Wash Your Hands

Avoid Contact With/When Sick

Avoid Touching Your Face

STOP THE SPREAD OF CORONAVIRUS

If You're Sick, Stay Home!

Keep Surfaces Clean

Cover Coughs & Sneezes

80%

Experience mild to moderate symptoms.

14%

Experience severe respiratory diseases (pneumonia or bronchitis)

↓ RISK

General Public Youth & Children (≤18)

↑ RISK

Recent Travel to Affected Areas
Ages 60+
Pre-Existing Conditions
Pregnant Women
Contact With Infected

A World Health Organization assessment of 44,000 cases in China has given the U.S. and New York State valuable insights about COVID-19.
