

**Good Morning,**

**Hello my name Zxavier Simpson. I'm a North west Bronx resident in Bedford Manor buildings. I live in a building with not only it has bad conditions we have tenants with severe health conditions that has affected how the building functions.**

**We don't have any local social services or other health support in the building. It should be mandated that if a developer of landlord gets subsidies for residents with special needs and working people with children should have on site social services. And affordable healthcare!**
